

# BL67 electronic module

## Connection of SSI Encoders

### BL67-1SSI

#### Functional principle

BL67 electronic modules are plugged on the purely passive base modules which in turn are connected to the field devices. The separation of connection level and electronics simplifies maintenance considerably. Flexibility is enhanced because the user can choose between base modules with different connection technologies.

The electronic modules are completely independent of the higher level fieldbus through the use of gateways.

Type designation	BL67-1SSI
Ident-No.	6827191
Number of channels	1
Supply voltage	24 VDC
Nominal voltage V <sub>i</sub>	24 VDC
Nominal current from field supply	≤ 50 mA
Nominal current from module bus	≤ 50 mA
Max. sensor supply I <sub>sens</sub>	500 mA not short-circuit proof
Power dissipation, typical	≤ 1 W
Transmission signals	CL, D
Connection type	4-wire full duplex (clock output/signal input)
Transmission rate	62.5 kbps up to 1 Mbps
Parameters	transmission rate, diagnostics, data format (binary-/GRAY-coded), data frame bits (1-32), number of invalid bits (LSB: 0-15, MSB 0-7)
Cable length	30m
Electrical isolation	isolation of electronics and field level via optocouplers
Output connectivity	M12, M23
Number of diagnostics bytes	1
Number of parameter bytes	4
Number of input bytes	8
Number of output bytes	8
Dimensions (W x L x H)	32 x 91 x 59mm
Approvals	CE, cULus
Operating temperature	-40...+70 °C
Storage temperature	-40...+85 °C
Relative humidity	5 to 95 % (internal), Level RH-2, no condensation (at 45 °C storage)
Vibration test	acc. to EN 61131
Extended vibration resistance	for mounting on DIN rail no drilling according to EN 60715, with end bracket
- up to 5 g (at 10 to 150 Hz)	
- up to 20 g (at 10 up to 150 Hz)	for mounting on base plate or machinery Therefore every second module has to be mounted with two screws each.
Shock test	acc. to IEC 68-2-27
Drop and topple	acc. to IEC 68-2-31 and free fall to IEC 68-2-32
Electromagnetic compatibility	acc. to EN 61131-2
Protection class	IP67
Tightening torque fixing screw	0.9...1.2 Nm

# BL67 electronic module

## Connection of SSI Encoders

### BL67-1SSI

#### LED display

LED	Color	Status	Meaning
D		OFF	No error message or diagnostics active.
	RED	ON	Failure of module bus communication. Check if more than 2 adjacent electronic modules are pulled. Relevant modules are located between gateway and this module.
	RED	FLASHING (0.5 Hz)	Upcoming module diagnostics
UP		OFF	No upward movement
	GREEN	ON	Upward movement
DN		OFF	No downward movement
	GREEN	ON	Downward movement

	m+7	Data byte 3													

n = Offset of input data; depending on extension of station and the corresponding fieldbus.

m = Offset of output data; depending on extension of station and the corresponding fieldbus.

With PROFIBUS, PROFINET and CANopen, the I/O data of this module is localized within the process data of the whole station via the hardware configuration tool of the fieldbus master. With DeviceNet™, EtherNet/IP™ and Modbus TCP a detailed mapping table can be created with the TURCK configuration tool I/O-ASSISTANT.

#### Note:

A software function module is available for simple handling of the synchronous serial interface (abbreviated SSI). This function module is available for the CoDeSys programmable BL67 gateway.

The actual sequence of the data of the SSI modules in the process data of the higher-level control system may vary from that shown here. The sequence in Profibus systems is generally the reverse (byte 0 complies with byte 7 etc.).
