

## Sub-base-SET MS6N-AQP

Part number: 526077

FESTO

### Data sheet

| Feature                          | Value                                     |
|----------------------------------|-------------------------------------------|
| Size                             | 6                                         |
| Type code                        | MS6-AGP                                   |
| Series                           | MS                                        |
| Corrosion resistance class (CRC) | 2 - Moderate corrosion stress             |
| Temperature of medium            | -10 °C ... 60 °C                          |
| Product weight                   | 300 g                                     |
| Pneumatic connection 1           | 3/8 NPT                                   |
| Pneumatic connection 2           | 3/8 NPT                                   |
| Note on materials                | Free of copper and PTFE<br>RoHS-compliant |
| Material of sub-base             | Die-cast aluminum                         |
| Seals material                   | NBR                                       |
