

*Hubbell Adaptive Technology
Occupancy Sensors*

*You Don't Adapt to Them...
They Adapt to You!*

*Now Featuring
Low Voltage with HVAC
Integration Capability*

The Hubbell Dual Technology Low Voltage Wall Sensor offers an energy savings solution for use with lighting, HVAC and to comply with Automatic Receptacle Control. The sensor operates with a control unit enabling line voltage and low voltage wiring to be easily separated. This makes for an ideal cost effective solution when used in smaller spaces such as private offices, conference rooms and restrooms.

The sensor features Hubbell's patented Adaptive Technology, eliminating the need for manual adjustment. It continuously analyzes the environment and automatically adjusts the sensitivity and timer based on the environmental history. This helps provide true maintenance free "Install and Forget" operation. This series features selectable Automatic ON/OFF or Manual ON/Automatic OFF, (vacancy only) operation modes with a built-in photocell for automatic daylight harvesting.
