Active area material Plastic, PBT-GF30-V0 Electrical connection Cable Cable quality Ø 3 mm, Blue, Lif9YYW, PVC, 2 m	Dimensions	19 x 15 x 10 mm
Electrical connection Cable Cable quality Ø 3 mm, Blue, Lif9YYW, PVC, 2 m	Housing material	Plastic, PBT-GF30-V0
Cable quality Ø 3 mm, Blue, Lif9YYW, PVC, 2 m	Active area material	Plastic, PBT-GF30-V0
	Electrical connection	Cable
Core cross-section 2 x 0.14 mm ²	Cable quality	Ø 3 mm, Blue, Lif9YYW, PVC, 2 m
	Core cross-section	2 x 0.14 mm²

Features

- Slot sensor, height 10 mm
- Plastic, PBT-GF30-V0
- ■DC 2-wire, nom. 8.2 VDC
- Output acc. to DIN EN 60947-5-6 (NAMUR)
- Cable connection
- ■ATEX category II 2 G, Ex-zone 1
- ■ATEX category II 1 D, Ex-zone 20 for temperatures up to +70 °C
- SIL2 acc. to IEC 61508

Wiring diagram

Functional principle

Inductive sensors detect metal objects contactless and wear-free. For this purpose they use a high-frequency electromagnetic AC field that interacts with the target. The sensors hosting a ferrite core coil generate the AC field through an LC resonant circuit.

Technical data

Vibration resistance	55 Hz (1 mm)
Shock resistance	30 g (11 ms)
Protection class	IP67
MTTF	6198 years acc. to SN 29500 (Ed. 99) 40 °C
Included in delivery	1 x M1,8 x 10 (DIN963A)

Mounting instructions

Mounting instructions/Description

Distance D	0 mm
Distance T	5 mm
Distance S	0 mm
Distance G	0 mm
Distance A	15 mm
Distance C	15 mm

Operating Instructions

Intended use

This device fulfills the directive 2014/34/EC and is suited for use in explosion hazardous areas according to EN 60079-0:2012 + A11 and EN 60079-11:2012. Further it is suited for use in safety-related systems, including SIL2 as per IEC 61508. In order to ensure correct operation to the intended purpose it is required to observe the national regulations and directives.

For use in explosion hazardous areas conform to classification

II 2 G and II 1 D (Group II, Category 2 G, electrical equipment for gaseous atmospheres and category 1 D, electrical equipment for dust atmospheres).

Marking (see device or technical data sheet)

⟨EX | II 2 G and Ex ia IIC T6 Gb acc. to EN60079-0 and -26 and ⟨EX | II 1 D Ex ia IIIC T95 °C Da IP67 acc. to EN60079-0

Local admissible ambient temperature

-25...+70 °C

Installation/Commissioning

These devices may only be installed, connected and operated by trained and qualified staff. Qualified staff must have knowledge of protection classes, directives and regulations concerning electrical equipment designed for use in explosion hazardous areas. Please verify that the classification and the marking on the device comply with the actual application conditions.

This device is only suited for connection to approved Exi circuits according to EN 60079-0 and EN 60079-11. Please observe the maximum admissible electrical values. After connection to other circuits the sensor may no longer be used in Exi installations. When interconnected to (associated) electrical equipment, it is required to perform the "Proof of intrinsic safety" (EN60079-14). Attention! When used in safety systems, all content of the security manual must be observed.

Installation and mounting instructions

Avoid static charging of cables and plastic devices. Please only clean the device with a damp cloth. Do not install the device in a dust flow and avoid build-up of dust deposits on the device. If the devices and the cable could be subject to mechanical damage, they must be protected accordingly. They must also be shielded against strong electro-magnetic fields. The pin configuration and the electrical specifications can be taken from the device marking or the technical data sheet.

Service/Maintenance

Repairs are not possible. The approval expires if the device is repaired or modified by a person other than the manufacturer. The most important data from the approval are listed.
